What This Replaces

Eliminates hours of manual work every week.

5-10 hrs/week saved

No more manually checking ad dashboards, Shopify analytics, or support inboxes. The system monitors everything and only surfaces what needs attention.

Instant issue detection

Refund spikes, ad underperformance, and urgent support tickets are detected and escalated within minutes — not discovered hours later by a human.

Zero-dashboard ops

The AI chatbot gives owners and managers real-time answers in Slack. Any question about orders, inventory, or revenue — answered in under 3 seconds.
