CareFlow AI

Homecare Operations

Eight interconnected automation pipelines that run a 40-caregiver, 65-client homecare agency end-to-end — scheduling, compliance, visit verification, and family communication, fully automated, running 24/7.

SYSTEM ARCHITECTURE

How It All Connects

Every pipeline follows the same disciplined pattern — and Google Sheets remains the single source of truth across all eight.

WORKFLOW BREAKDOWN

8 Automated Pipelines

Each pipeline runs automatically — triggered by an event or a schedule — and shares one source of truth: a Google Sheets database.

P1 · FORM TRIGGER

Client Intake & Onboarding

A new referral submits an inquiry form. AI classifies urgency and care level, an intake packet is emailed to the family automatically, and the coordinator is notified — within minutes, with zero manual data entry.

Google FormsGroq AIGmail

P2 · FORM TRIGGER

Caregiver Onboarding & Documents

New applications are screened by AI (qualified / needs review / not qualified), a personalized document checklist is emailed automatically, and a welcome message fires the moment onboarding is complete.

Google FormsGroq AIAuto-Triage

P3 · SMART MATCHING

AI Smart Scheduling Engine

AI reviews every active caregiver against a client's required skills, zone, availability, and existing schedule — then recommends the best match with a stated reason and creates the calendar event automatically.

Groq AIGoogle CalendarSmart Matching

P4 · TELEGRAM TRIGGER

Clock-In / Clock-Out + EVV

Caregivers clock in and out with one command from their phone. The system timestamps the visit, calculates hours, alerts the coordinator when someone is 15+ minutes late, and produces the EVV compliance record.

Telegram BotEVV ComplianceReal-Time

P5 · AI STRUCTURING

AI Care Notes Processor

Caregivers submit visit notes in plain language. AI restructures them into clinical SOAP format, checks them against the client's care plan for completeness, and flags the coordinator if anything concerning appears.

Groq AISOAP NotesAuto-Flagging

P6 · EVENT-DRIVEN

Family Communication Hub

The moment a caregiver clocks out, the family automatically receives a visit summary. Every Sunday, each family also receives a consolidated weekly summary — no one has to remember to send an update.

GmailGroq AIAuto-Routing

P7 · DAILY · 7 AM

Compliance & Certification Tracker

Every morning, the system checks every caregiver's HHA, CPR, TB, background check, and HIPAA status against expiry dates — sending 60/30/14-day renewal reminders and escalating missed deadlines automatically.

Groq AIComplianceAuto-Alerts

P8 · WEEKLY · MONDAY 8 AM

Weekly Operations Intelligence Report

The centerpiece. Every Monday, the system pulls a full week of data — hours vs. scheduled, missed visits, late clock-ins, outstanding notes, expiring certifications — and **AI writes a plain-English executive summary** with action items, delivered straight to the owner's inbox. No dashboards, no manual compiling — just answers.

LIVE DEMO

Clock In From Your Phone, Instantly Logged

Caregivers don't need an app or a login — just a single Telegram command. The system timestamps the visit, calculates hours, and produces the EVV compliance record automatically, in real time.

CareFlow Bot

✔ **Clocked in** — Maria S. at 123 Oak St, 9:02 AM. EVV record logged. Visit duration tracking started.

Family notified: "Maria has arrived for today's visit."

TECHNOLOGY

Built On a 100% Free Stack

Every tool runs on a free tier — making the system realistic for small agencies that cannot justify enterprise software costs.

BUSINESS IMPACT

What This Replaces

Eliminates roughly half of a full-time coordinator's workload — without adding headcount.

**~20 hrs/week saved**

No more chasing clock-ins, cross-referencing schedules by hand, or compiling weekly reports. The system runs continuously and only surfaces what needs attention.

**Lower compliance risk**

Automatic 60/30/14-day certification alerts catch HHA, CPR, TB, and HIPAA lapses before they become liabilities — or lost contracts.

**Higher family satisfaction**

Proactive visit summaries and weekly updates replace the anxiety of "no news" with consistent, automatic reassurance — every single time.
